

ABOUT

Creating Connections is a family-based school based in Montalcino, Tuscany. Our family is specialised in language courses for children, teenagers and adults.

Apart from language courses (EFL), we also offer an alternative way of learning English – the Bilingualism Project (BP). The Bilingualism Project is a programme that aims at teaching English to children aged 3-15 through a rich, tailor-made curriculum inspired by the Cambridge Primary curriculum and integrated by the approaches of VOICE 21. The EFL children and teens aged 3-17 follow twice-a-week English lessons, whereas the BP children are taught English as a second language through the study of literature and poetry, maths and science, art, music and theatre. The BP aims at teaching English through content that is both interesting and morally enriching, teaching the children how to communicate efficiently, build relationships with each other and explore their talents. The BP children come to our school for 6 hours a week, either after school or all Saturday morning.

Signing up for our courses, either EFL or the BP, gives the students access to a wide range of intercultural possibilities: specialised workshops (technology, art, theatre, poetry reading), cultural initiatives, Full Immersion Weekends, penfriend projects, e-learning and fieldtrips. During summertime, we offer Summer Camps and advice on study vacations and intensive/professional training courses or placements abroad.

Collaborating with other teachers and partner schools in foreign countries, we create connections between and among private customers, companies and schools.
